FUJIFILM

# THE THINNEST SILVER HALIDE PHOTO PAPER DESIGNED FOR MOUNTING TO DOUBLE SIDED PAGES OR POSTCARDS.

Fujicolor Crystal Archive Album Paper is designed exclusively for digital output for production of photo books, post cards and greeting cards. The thin base of Fujicolor Crystal Archive Album Paper is specially designed for the assembly and mounting of prints after processing, resulting in easy to handle double sided photo album pages perfect for bookmaking. Keeping with our commitment to expand print options and offer innovative products to the marketplace, Album Paper provides you an opportunity to deliver photo albums with image quality your most discerning customers are sure to appreciate!

The same long lasting results you know and trust from Fujicolor Crystal Archive technologies can be found in Album Paper, including pure whites, vibrant color reproduction, easy handling and excellent image stability. Most importantly, a specially designed base paper technology has been developed which results in easy-to-handle photo album pages after prints have been assembled and mounted using one of the many popular solutions for making book blocks. The end result is a beautiful keepsake from cover to cover.

Exceptional Crystal Archive image stability assures your Customer's most cherished moments will withstand the test of time with unparalleled silver halide print permanence. For truly high-image-quality photo albums, Fujicolor Crystal Archive Album Paper will reproduce these moments just as your customers remember them.

## ALBUM PAPER

**Specially Designed Base Paper Technology** – Resulting in easy-to-handle photo album pages after prints have been assembled and mounted.

**Pure Whiteness** – Clear, more distinct print images and sharper text quality.

**Vibrant Color Reproduction** – Produces true colors such as subtle shades of green and vivid blues and reds.

**Excellent Image Stability** – Highest level of silver halide image stability.

**Available Sizes** – 5, 6, 8, 10, and 12 inch widths x 820 feet, as well as new 30 inch x 230 feet for use with printer processors supported by x-y cutters, such as The Chromira Pro Lab.

**Processing** – Fuji Hunt CP-RA Process or RA-4 type processes.
