

RECORDABLE CDs - RELIABLE PUBLISHING AND DISTRIBUTION MEDIA

Fujifilm CD-Recordable (CD-R) discs are the superior choice in write-once optical media. Technological advances abound in the latest line-up of Fujifilm CD-R discs. Our discs have optimal archival life, proven prevention against data degradation and high read-back reliability.

[LOWER ERROR RATES FOR SUPERIOR PERFORMANCE]

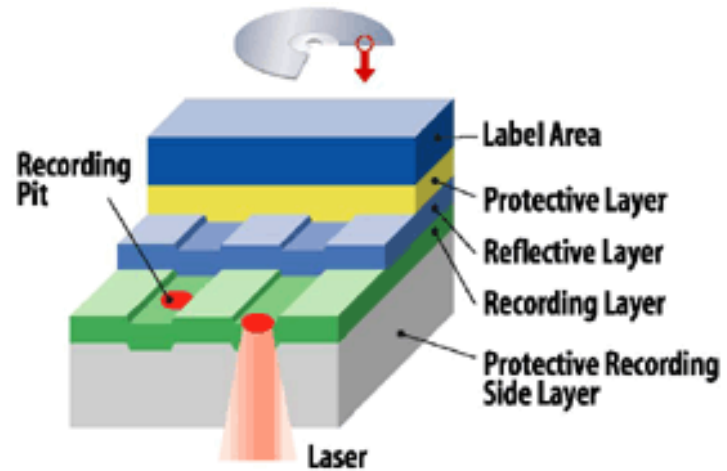

A newly developed, high-sensitivity organic color layer - the fruit of Fujifilm's extensive organic color layer library - and highly reflective film layer gives Fujifilm CD-R improved reflectivity at lower power levels. This means lower error rates even with compromised power levels in the write laser or if the lens is dirty.

[WIDE DRIVE COMPATIBILITY]

Rigorous testing has confirmed that Fujifilm CD-Rs are compatible with today's most popular CD-R writers and CD-ROM drives.

[LONG LIFE, SUPERIOR ARCHIVING]

Fujifilm CD-R discs have superior longevity, offering over a million read passes without data degradation. And for archiving they are simply unsurpassed. CD-R provides an astonishing 70-100 years archiving capability.

CD-R Structural Cross Section

COMPATIBILITY CHART

	Conventional CD-ROM Drive	Multi-Read CD-ROM Drive	CD-R Writer	CD-RW Drive	DVD-ROM Drive	DVD-R Writer	DVD-RAM Drive
CD-ROM	R	R	R	R	R	R	R
CD-R	R	R	R/W	R/W	R*	R*	R*
CD-RW	X	R	X	R/W	R*	R*	R*

R - Readable

W - Writable

X - Neither

*Drive dependent

SPECIFICATIONS

	CD-R
OUTER DIAMETER	120.0±0.3mm
INNER DIAMETER	15.0+0.1/0.0mm
THICKNESS	1.2+0.3/-0.1mm
REFLECTION RATE	>65%
RECORDING CAPACITY	700MB
RECORDING TIME	80 minutes
READ CYCLE	1 million passes
TEMPERATURE	-5~+55°C, 23~131°F
HUMIDITY(non-condensing)	5~95%RH

(Operating Temperature: 60~80°C,
85% RH for accelerated save tests

Read Durability: 1 million reads with CD-ROM drive

Light Durability: 32 hour fade-test at 73,000 lux)

Specifications subject to change.
