A. Mounting the camera lens

Position lens in the camera’s bayonet mount so that the mounting indexes on lens and camera body are aligned, then twist lens counterclockwise until it locks into place.

B. Loading the batteries

1. Set the Power switch to “OFF” to turn the camera off. Turn the battery holder release catch counterclockwise to unlock the battery holder. Pull the battery holder out.

2. Load the AA-size Ni-MH rechargeable batteries in the direction indicated by the and labels on the holder.

3. Push the battery holder in and hold it in place as you turn the battery holder release catch clockwise to securely lock the battery holder.

C. Setting up the camera

1. Align the gold marking on the xD-Picture Card slot with the gold contact area on the xD-Picture Card™ and push the card firmly all the way into the slot. Push the CF/ Microdrive firmly all the way into the CF/Microdrive slot.

2. Close the slot cover.

D. Taking pictures

1. Set the Exposure mode dial to “P” (Auto-Multi Program).

2. Press the shutter button down halfway to adjust the focus.

3. Press the shutter button down fully to take a picture.

E. Viewing pictures

1. Press the “PLAY” button.

2. Press the “<” or “>” to move through your images.

Still images that can be viewed on the FinePix S3 Pro

You can use this camera to view still images recorded on the FinePix S3 Pro or still images (excluding some uncompressed images) recorded on a FUJIFILM digital camera that supports xD-Picture Card or CF/ Microdrive.

Refer to Owner’s Manual for more detailed instructions

3. Set the Power switch to “ON”.

4. Unlock the 4-direction button. Press “<” or “>” to select Year, Month, Day, Hour or Minute and then press “A” or “V” to adjust the selected setting. Press the “MENU/OK” button after you complete the setting. *Refer to owner’s manual for date/time setup.

* Compatibility is listed on Fujifilm website: http://home.fujifilm.com/products/digital/
**A. Install Software**

Do not connect the camera to your PC until the software installation is completed.

1. Turn on your PC and start up Windows.
   - Users of Windows 2000 Professional or Windows XP should log in by using a system administrator account (e.g. “Administrator”).
2. Quit all other active applications until no applications are shown in the taskbar.
3. Load the enclosed CD-ROM into the CD-ROM drive. The installer starts up automatically.
4. The Setup screen appears.
   - Click the [Installing FinePixViewer] button.

5. After installation completed, press [Restart] button.

**B. Connect the Camera to your PC**

1. Load a media containing photographed images into your camera.
2. Set the “USB MODE” or “1394 MODE” setting in the “SET-UP” menu to digital camera “!” and “@” (Refer to “USING THE SET-UP SCREEN” in the owner’s manual).
3. Turn your camera off.
4. If you have one, plug the AC power adapter connector into the “DC IN 5V” socket on the camera and then plug the adapter itself into the main power outlet, otherwise be sure your batteries are is fresh and charged.
5. Use the USB cable (mini-B) or IEEE 1394 cable to connect the camera to your PC.
6. Turn the camera on.

**C. Save Images**

1. The Save image Wizard starts up. Click the [NEXT] button.
2. Check that the files are downloaded from the camera to your PC and that a folder with the date is created.
   - Ex. \My Documents \ My Pictures \ 2004_0312 Image

**D. View Images**

1. Click the [Show List of Images] button.
2. Select “Preview” in the View menu to display an enlarged image.

For more information
