Pro-Jet™ Aqueous Dye-based Liquids

High performance aqueous dye-based liquids developed for the inkjet market. Custom designed for a wide variety of industrial and photo applications.
HIGHLY PURIFIED CONCENTRATES PRODUCING VIBRANT INKJET INKS WITH ENHANCED WATER FASTNESS AND OPTICAL DENSITY. HIGH QUALITY READY-TO-FORMULATE SOLUTIONS.

PURIFICATION GIVES US A CLEAR DIFFERENCE
All our Pro-Jet™ dye-based liquids undergo a rigorous purification process to ensure the lowest possible levels of insoluble materials such as metals and salts. Carbon treatment, ion exchange, reverse osmosis and sub-micron filtration are all used to produce market-leading products for our customers to use in their formulations.

INNOVATION AND LEADERSHIP
FUJIFILM Imaging Colorants is a global leader in the development and supply of high performance colorants and offer high quality custom-designed products for inkjet printing. With approaching thirty years history of market leading innovation in colorants for inkjet, and a heritage in dyes and pigments that reaches back almost one hundred years. FUJIFILM Imaging Colorants is uniquely placed to deliver color to digital print. Our Pro-Jet™ aqueous dye-based liquids products are used in an expansive range of applications from office, coding and marking, wide format graphics through to photo and commercial print.

PERFORMANCE
Pro-Jet™ aqueous dye-based liquids offer advanced product performance based on:
- Novel dye chromophores
- Market leading photographic performance (light and ozone fastness)
- All-round performance in colour strength and gamut
- Enhanced water fastness on plain paper
- High purity, stable liquids
- Low salt and metal content
